About Splunk Enterprise licenses

Splunk Enterprise takes in data from sources you designate and processes it so that you can analyze it. This process is called **indexing**. For information about the indexing process, see What Splunk Enterprise does with your data in *Getting Data In*.

Splunk Enterprise licenses specify how much data you can index per day.

For more information about Splunk licenses, see the following:

- How Splunk licensing works in the *Admin* manual.
- Types of Splunk Enterprise licenses in the *Admin* manual.
- More about Splunk Free in the *Admin* manual.
